Project

Blog App Project (HTML,Tailwind CSS,Javascript)

[Live Website](#)

The design features a responsive grid of content cards, each with an image, heading, and descriptive text. The header and footer sections are streamlined, providing a simple yet elegant user experience.

Color Palettes(HTML,CSS,Javascript)

[Live Website](#)

This web application allows users to explore and interact with a variety of color palettes. Designed with a user-friendly interface, the application showcases color samples that users can click to view and copy the color codes.

Blog Website(HTML,CSS)

[Live Website](#)

Welcome to our modern and responsive website, meticulously crafted using HTML and CSS, with an elegant touch from Google Fonts and Font Awesome. This site is hosted on Netlify, ensuring fast load times and reliable performance across all devices.

Education
